Catalogue 2021

LIMBO EUROPE

Innovation. Ecology. Handcrafted.

Our aim is to offer innovative and environmentally friendly funeral solutions.
We strive to provide reliable products and services to funeral homes.

Our innovations have become the model to follow in the funeral industry.

Families who work with us look for a dignified, moving and environmentally friendly farewell for their loved ones.

We are proud members of ICCFA, ALPAR and NFDA.

Ecological alternative: Hermetic NOZn bag

Ecological alternative for
transporting deceased people

Handmade bags

High quality biodegradable materials.

1. Airtight
2. Minimum storage space
3. Biodegradable
4. Light. Brings down transport costs
5. Can be incinerated
6. Easy to install

We use biodegradable materials in many of our products and provide solutions that reduce waste from funeral sector processes.

Made in Europe, Spain.

LIMBO EUROPE

Hermetic NOZn bag

Zinc-free casket

An ecological alternative for transporting deceased people.

The Hermetic NOZn is an airtight biodegradable body bag that complies with the regulations for transport of bodies by land or air.

Different shapes and sizes available.

LIMBO EUROPE

Hermetic NOZn bag

Zinc-free casket

An ecological alternative for transporting deceased people.

Velcro strips to fix the product inside the coffin

Internal rods that keep the form of the product and facilitate the identification of the corpse.

Sealing airtight system composed by zipper covered by adhesive strip.

LIMBO EUROPE

Hermetic NOZn bag

Eco filter

Incinerable. Ecological.

The Limbo Filter is specially designed to filter out the gases that may be given off inside the Hermetic NOZn when transporting a body. It avoid risky pressure changes in air transport. The product works by filtering out these gases and preventing bad odors.

LIMBO EUROPE

Hermetic NOZn bag

Hermetic biodegradable body bag SU1

Its double-zip system with adhesive strip means it is totally airtight. Manufactured with biodegradable materials so it can be used for both burials or cremations. During the cremation, it does not give off toxic waste over allowed emission limits.

One size: 2,25 m

Rectangular shape

Biodegradable urns for humans

Biodegradable urns which when placed in their final resting place allow the loved one's ashes to be returned to the biosphere

Craftsmanship: unique pieces

We choose the option with the least
environmental impact

We use biodegradable materials in many of our products and provide solutions that reduce waste from funeral sector processes.

Handcrafted in Spain. Europe.

LIMBO EUROPE

Fingerprint Jewelry

High quality personalised jewellery, featuring fingerprints. Combination of craftsmanship and unique techniques leads to outstanding jewellery.

Different materials and combination to choose: white gold, yellow gold, silver.

The green memory:

A flower arrangement made up of removable living plants, for remembering our loved ones.

LIMBO EUROPE

The green memory

The green
memory

An innovative concept which turns the traditional floral wreath into an organic form of remembrance in which relatives and close friends can participate.

Instead of cut flowers, use a floral remembrance made up of removable living plants and share them at the ceremony.

LIMBO EUROPE

The green memory

The green
memory

The green memory is composed of three elements:

Ring

Pots

Pot holder

LIMBO EUROPE

The green memory

The green
memory

The green memory: ring

The ring is the part of the wreath which can be reused.

It is assembled by connecting 4 pieces that will form the circular base.

2 colors available

LIMBO EUROPE

The green memory

The green
memory

The green memory: pots

The pots together form a wreath. Each pot can be separated easily from the ring in order to offer the plants to the family as a present.

The pots are designed with a patented system that fit in the ring.

2 colors available
